FOREST INDUSTRY GROUP FINDS ITS IDEAL SINGLE SERVICE PROVIDER

TMF Group had the geographic reach, flexibility and local expertise that Metsa Group was looking for.

About the client

Metsä Group is a Finnish forest industry group with core businesses in tissue and cooking papers, paperboard, pulp, wood products, wood supply and forest services. Metsä Group uses renewable fully traceable northern wood as raw material. The company's annual turnover is approximately €5bn. Metsä Group has production facilities in Europe and sells its products globally, with offices and agents worldwide.

In their own words

"We had centralised our ways of working and processes, and we were looking for a single service provider with flexibility to work in with how we choose to operate. We also wanted a provider with considerable local knowledge to handle our reporting.

"We already had good experiences with TMF Group in the Middle East and Southern Europe, so we decided to build on that relationship and chose them."

How TMF Group helped

"TMF Group handles our VAT, tax declarations and financial statements. Their experts follow changes in local rules and regulations and provide us with updates.

"The transfer to TMF Group was a rather smooth one, considering the many details involved. It was very easy for TMF Group to come in and understand our requirements. The fact that they operate worldwide is a big plus - whenever we establish new entities, they can easily be included in the TMF Group service.

"Compliance, accuracy and reliability are attributes that we value in our business partners, and we can count on all three with TMF Group."

In the future

"Metsä Group is planning to grow, in Europe but also in America and Asia. If we establish new offices globally we would definitely consider including them in TMF Group's scope, but also widening the services they provide to our existing offices."

"Compliance, accuracy and reliability are attributes that we value in our business partners, and we can count on all three with TMF Group."
