## What is this product?

### Type

■ This product is a class of share of the Sub-Fund and denominated in EUR. The Fund is an investment company with a variable capital and qualifies as a Special Investment Fund ("SIF"), subject to the Luxembourg law of 13 February 2007 related to SIF and the Luxembourg law of 12 July 2013 related to Alternative Investment Fund Managers ("AIFM") transposing Directive 2011/61/EU as amended.

■ As an investment fund, the return of the Sub-Fund depends on the performance of its underlying assets.

### Objectives:

#### Investment objective:

■ The objective of the Sub-Fund is to deliver consistent capital appreciation of the value of its assets by investing in a diversified portfolio of transferable securities and financial instruments, including derivatives.

#### Investment policy:

■ The Sub-Fund may also hold, on an ancillary basis, cash and cash equivalents subject to the restrictions described in the prospectus, unless otherwise established in the Sub-Fund's specific section.

■ By investing in the transferable securities, financial instruments and derivatives the Sub-Fund aims at implementing an alternative investment strategy while focusing on equities arbitrage opportunities. Equity hedge typically consists of a core holding of long equities hedged with short sales of stocks or stock index options. Long and short equities positions may be taken with ordinary securities and derivatives on these securities and/or index derivatives.

■ The Sub-Fund may, under the conditions and within the limits laid down by law (in particular Securities Financing Transaction Regulation ("SFTR")), regulation and administrative practice and as described below, employ Securities Financing Transactions ("SFTs") and derivative instruments relating to transferable securities and money market instruments. The Sub-Fund may employ SFTs for reducing risks (hedging), generating additional capital or income or for cost reduction purposes. The Sub-Fund may also invest, if allowed by its investment policy, in financial derivative instruments including but not limited to non-deliverable forwards, total return swaps ("TRS"), interest rate swaps, currency swaps, credit default swaps, and credit linked note for either investment or for hedging purposes. In doing so, the Sub-Fund shall comply with applicable restrictions and SFTR.

■ No investment in any transferable securities of the same kind or money market instruments issued by the same entity can exceed twenty

percent (20%) of the Sub-Fund's total assets. Any position exceeding the twenty percent (20%) limit due to an appreciation of the initial investment or a depreciation of any other investments has to be readjusted accordingly as soon as possible and by taking due account of the interests of the holders of shares within the Sub-Fund.

■ No more than twenty percent (20%) of the total assets of the Sub-Fund may be invested in other fund of funds.

■ The Sub-Fund is actively managed with no reference to a benchmark.

■ The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

■ Given the objectives and risk and reward profile of the product, the recommended holding period is 5 years.
