What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 30 March 2015 and 30 March 2018.

Moderate: this type of scenario occurred for an investment between 28 April 2020 and 28 April 2023.

Favourable: this type of scenario occurred for an investment between 31 May 2019 and 31 May 2022.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of TMF Fund Management S.A. to pay you.

Not all risks affecting the Sub-Fund are adequately captured by the summary risk indicator.

This rating does not take into account other risk factors which should be considered before investing, including pharmaceutical sector risk, equity risk, foreign currency risk, growth stocks risk, liquidity risk, market risk, small and mid-sized companies risk.

If TMF Fund Management S.A. is not able to pay you what is owed, you could lose your entire investment.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Fund performance. Please refer to the prospectus, available free of charge at the registered office of the Fund.

What happens if TMF Fund Management S.A. is unable to pay out?

You are exposed to the risk that the Fund might be unable to meet its obligations in connection with this product. This may materially adversely affect the value of the product and could lead to you losing some or all your investment in this product. A potential loss is not covered by an investor compensation or protection scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. They are based on the following regulatory assumptions: (i) in the first year, you would get back the amount that you invested (0% annual return) and, for the other holding periods, the product performs as shown in the moderate scenario and (ii) 10,000 is invested.

Example Investment € 10,000	if you exit after 1 year	if you exit after 3 years (recommended holding period)
Total Costs	€ 605	€ 1,435
Annual cost impact*	6.1%	4.3%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.7% before costs and 3.4% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
Entry costs	3.00% maximum of the amount you pay in when entering this investment. In case of conversion into shares of another class or another sub-fund, a maximum 1% conversion fee may be charged in favour of the Sub-Fund.	€ 300
Exit costs	0.00% , we do not charge an exit fee for this product, but the person selling you the product may do so.	€ 0
Ongoing costs taken each year		Annual cost impact if you exit after 1 year
Management fees and other administrative or operating costs	2.80% of the value of your investment per year. This is an estimate based on actual costs over the last year.	€ 280
Transaction costs	0.00% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€ 0
Incidental costs taken under specific conditions		Annual cost impact if you exit after 1 year
Performance fees	0.25% of the value of your investment per year. This is an estimate, calculated on an annualised basis, based on the average over the previous 5 years. We charge 10% of the positive performance over the high water mark. The actual amount will vary depending on how well your investment performs.	€ 25

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

The RHP has been defined by taking into account the above investment policy and risk and reward profile. You should be prepared to stay invested for at least 3 years. However, you can redeem your investment without penalty prior to the end of the RHP or hold the investment longer. Redemption and conversion requests must be received by the Fund no later than 5 p.m. Luxembourg time on the applicable valuation day. Any cashing-in before the end of the RHP may have a negative consequence on your investment.
